narainkarthikeyan20@gmail.com ◇ [LinkedIn](#) — [GitHub](#) — [LeetCode](#)

OBJECTIVE

Java Developer with hands-on experience in Spring Boot, REST APIs, React.js, Node.js, MySQL, and MongoDB. Strong knowledge of Data Structures, Object-Oriented Programming, DBMS, and Software Engineering. Passionate about developing scalable backend systems and full-stack web applications.

EDUCATION

B.Tech. Artificial Intelligence and Data Science, 2023 – Present
Sri Krishna College of Engineering and Technology, **CGPA: 8.26/10**

Higher Secondary Education, GRG Matriculation Higher Secondary School 2021 – 2023
HSC: 89.3%

SKILLS

Languages: Java, Python, SQL, JavaScript	Backend: Spring Boot, REST APIs, Node.js, Express.js
Frontend: React.js, HTML5, CSS3, Tailwind CSS	Databases: MySQL, MongoDB
Core CS: DSA, OOP, DBMS, OS, Computer Networks	Tools: Git, GitHub, Postman, VS Code

CERTIFICATIONS

AWS Cloud Practitioner Essentials – AWS	Data Science with Python – Infosys Springboard
Machine Learning Onramp – MathWorks	Introduction to Business Analytics – Coursera
People & Soft Skills Assessment – IBM	

EXPERIENCE

AI/ML Intern May 2026
Interface Infosys

- Developed an AI-powered inventory prediction system using Machine Learning algorithms for demand forecasting.
- Analyzed historical sales datasets to generate predictive insights and improve inventory planning.
- Applied data preprocessing and feature engineering techniques to enhance forecasting accuracy.
- Collaborated with a development team to optimize inventory management workflows.

PROJECTS

Expense Tracker (React.js) Developed a responsive expense management application using React.js and Hooks for state management. Integrated Recharts to visualize expenses through interactive charts and implemented CRUD operations for efficient expense tracking.

HR Management System (Spring Boot, MySQL) Built RESTful APIs for employee, payroll, attendance, recruitment, and department management using Spring Boot. Implemented CRUD operations with MySQL and followed layered architecture for scalable backend development.

Rentro - Car Rental Platform (MERN Stack) Designed and developed a full-stack car rental platform with authentication, vehicle booking, filtering, admin dashboard, and Stripe payment gateway integration using MongoDB, Express.js, React.js, and Node.js.
